Dear Sir/Madam

DFFE Directorate: Biodiversity Conservation hereby acknowledge receipt of the invitation to review and comment on the project mentioned on the subject line. Kindly note that the project has been allocated to Mrs M Rabothata (Copied on this email). In addition, kindly share the shapefiles of the development footprints/application site with the Case Officers.

Please note: All Public Participation Process documents related to Biodiversity EIA review and any other Biodiversity EIA queries must be submitted to the Directorate: Biodiversity Conservation at Email: [BCAdmin@dffe.gov.za](mailto:BCAdmin@dffe.gov.za) for attention of Mr Seoka Lekota

Regards,  
Tebego

**Subject:** Draft MMP Bigai Wetland Maintenance Management Plan for COMMENT

Good Afternoon,

**RE: REQUEST FOR COMMENT ON THE BIGAI WETLAND MAINTENANCE MANAGEMENT PLAN, KNYSNA MUNICIPAL DISTRICT**

Your attention is drawn to the attached MMP for the Bigain Wetland in Knysna.

The Bigai Wetland runs through a portion of Knysna, bordering and including the Knysna Municipal Golf Club. It is a small catchment area. Historical and continued development along this catchment has resulted in (A) an increase in hardened surfaces which equates to an increase in stormwater runoff volumes and (B) there has been substantial erosion in this catchment area resulting in siltation and sediment blocking existing culverts and stormwater channels in the wetland. The system feeds into the Knysna Estuary and it is important that its function of providing freshwater to the Estuary is maintained (currently the blockages are compromising this function).

cid:image003.png@01D9F07F.3C3AF570

As a result, culverts and stormwater channels in the wetland are blocked (either by vegetation growth or sediment), resulting in chronic flooding which has increased over time. Some of the streets within this study area is permanently inundated with water resulting in tremendous challenges to residents and municipal workers alike who has to traverse these streets on a daily basis. **This MMP is ONLY for the clearing of culverts/existing stormwater channels in the wetland.** The majority of work will be done by hand with some areas requiring minimal machinery to excavate material.

The recommended maintenance work does **not involve the development of any new infrastructure or structures.** In summary, Table 9 of the draft MMP stipulates each of the areas (culverts) that must be cleaned out, along with their coordinates (these are also all mapped) and the necessary work methods and mitigation measures.

This document is in draft format and has been compiled by Confluent Consulting on behalf of the Knysna Municipality (as the landowner and Applicant). Confluent Consulting in turn requested that Cape EAPrac assist with the stakeholder engagement process prior to submission of the Final MMP to the National Department of Fisheries, Forestry & Environmental Affairs (DFFE) for decision-making.

During consultation with the DFFE, the Case Officer requested that the draft MMP be distributed to Key Stakeholders (Authorities) ahead of the official 30-day commenting period to allow some additional time for Authorities to review and submit comment on this draft document.

The DFFE has highlighted the importance, to them, of having your comment (if applicable) to inform their decision-making process.

You will also be receiving the official (30-day) commenting period day notice, which will contain the last day (date) for submission of comments. In the interim however please do take some time to consider this MMP and should you have any queries please do not hesitate to contact me directly.

Considering the recent flooding over the weekend, the Municipality urgently needs to conduct the maintenance work as stipulated in this MMP. Your input is therefore requested at your earliest convenience.

Kind regards / Met Vriendelike Groete,

**Date:** Friday, 03 November 2023 14:10:00

---

Good Afternoon Mr Burns,

RE: CONFIRMATION OF REGISTRATION AND RECEIPT OF COMMENT, BIGAI WETLAND SYSTEM MAINTENANCE

Thank you kindly for sending through below submission.

I can confirm that the details of the stakeholders listed in your submission have been entered to our database, but I do notice that the contact details provided are incomplete. It will be highly appreciated if you can please provide complete contact details in the form of an email address, or postal address for said stakeholders, to ensure that we can send written correspondence to these stakeholders also and can complete the stakeholder register.

I further notice that you have already copied Mrs Booth from the Municipality and will await feedback from her office with regards to the work the Municipality's has undertaken in terms of their Section 30A Emergency Directive.

The MMP is specific to low key maintenance activities that is intended to alleviate flooding experienced in identified areas (cleaning out of culverts / stormwater channel / associated removal of vegetation to achieve said clearing). The Emergency Directive is separate from the MMP, but does not replace the MMP as the latter is intended for short as well as medium maintenance of the infrastructure identified in the MMP, whereas the Municipality obtained an emergency Directive for work they deemed urgent.

I can confirm that we also notified the Case Officer responsible for considering the MMP, of the Directive issued by the Department, to ensure transparency.

As soon as I receive the Municipality's feedback on the work/tender for their Directive which you point out in your submission, I'll be in a better position to provide a more accurate response to your submission.

Kind regards / Met Vriendelike Groete,

Dear Louise-Mari van Zyl

Without Prejudice

Good day

Re: Registration as an Interested and Affected Party with respect to the MMP-Bigai Wetland System  
Application DFFE Ref 2023-08-007 WUL Ref. WU30915

The above refers:

1. Kindly register the following interested parties; E R Steele, M J Steele and J T Steele as interested and affected parties.re <<http://parties.re>> : abutting and/or aligned property owners of [REDACTED]

2. Kindly register P Burns. [REDACTED]

Comments:

Kindly note the following prima facie contraventions having occurred and/ or currently in practice during the commenting period window that closes 13 November 2023:-

1. It is alleged, herewith, that Knysna Municipality has commenced activities using heavy machinery to reshape earth embankments in the Howard Street road reserve and central river channel off Howard Street -at the intersection of the main stream central channel and under road culverts-, as of approx. 13H00, 02 November 2023. Photographic evidence of both vehicles and personnel involved together with witnesses to the activities has been documented.

2. Kindly note that the Knysna Municipality, has published and called for a tender RFQ250/2023/24 as of 13/10/2023 and closed out on 20/10/2023 re: 'Appointment of a freshwater Consultant for the removal of silt and thinning of reeds in the reeds bed between Howard Street and Wilson Street according to S30 A Directive' with facilitator P. Booth fulfilling a role as the Knysna Municipality representative.( emphasis of the writer)

Whereas,

It is noted with concern;-

2.1 the above recorded contraventions -perceived or actual- raises numerous issues vis-a-vis; conflict of interest, legality of the MMP, actual or potential contraventions of the NEMA regulations, actual or potential contraventions in the advertised Listing Notice content, and EAP practices pursuant to the procedural requirements, inclusive of the NEMA Public Participation content and practice prerequisites.

2.2 a record of 'silt' being recorded in the tender without an assigned volume. We note the advertised Listing Notice specifications do not refer to any soil or silt being considered in the MMP application process or subject to NEMA listing regulations.

2.3 the tender has been published with the content already determined and/or the scope of work to be assigned to the contractor to be defined, before the end of the commenting period. The ability to provide valid bona fide commentary has, unfortunately, been denied to I&APs. Refer to Knysna's : Tender Portal.

2.4 Comments are not exhaustive of the above recorded issues and will be developed accordingly- inclusive of the EAP's comments on the above issues.

3. We reserve fully all our respective legal rights.

I respectfully request that you investigate the following comments and issues. The EAP is respectfully requested to practice legality doctrine in attending to the recorded issues and make apparent the necessary disclosures. We respectfully request that you record with us any comments you may have.

Sincerely

Philip Burns

Dear Louise-Mari and Mr Burns

Please find attached a S30A directive issued by the Directorate Integrated Environmental Authorisations, DFFE.

Compliance inspections will take place in the last week of November.

Mr Burns is welcome to participate.

RFQ for aquatic scientist for selective clearing of reeds will be evaluated this week. Work to commence within two weeks.

Dear Madam

**RE: REQUEST FOR COMMENT FROM THE SUB-DIRECTORATE: COASTAL MANAGEMENT ON THE BIGAI WETLAND MAINTENANCE MANAGEMENT PLAN (MMP) KNYSNA MUNICIPAL DISTRICT.**

**1. LEGISLATIVE CONTEXT**

- 1.1. The Integrated Coastal Management Act, 2008 (Act No. 24 of 2008) ("NEM: ICMA") is a Specific Environmental Management Act under the umbrella of the National Environmental Management Act, 1998 (Act No. 107 of 1998) ("NEMA"). The NEM: ICMA sets out to manage the nation's coastal resources, promote social equity and best economic use of coastal resources whilst protecting the natural environment. In terms of Section 38 of the NEM: ICMA, the Department of Environmental Affairs and Development Planning ('the Department') is the provincial lead agency for coastal management in the Western Cape as well as the competent authority for the administration of the "Management of public launch sites in the coastal zone (GN No. 497, 27 June 2014) "Public Launch Site Regulations".
- 1.2. The Department, in pursuant of fulfilling its mandate, is implementing the Provincial Coastal Management Programme ("PCMP"). The PCMP is a five (5) year strategic document, and its purpose is to provide all departments and organisations with an integrated, coordinated and uniform approach to coastal management in the Province. The Department has developed the next generation PCMP that includes priority objectives for the next 5 years. This PCMP was endorsed by the MEC on 27 March 2023 and may be viewed at <https://www.westerncape.gov.za/eadp/about-us/meet-chief-directorates/environmental-sustainability/biodiversity-and-coastal-management>.

- 1.3. A key priority of the PCMP is the Estuary Management Programme, which is predominantly implemented through the Estuary Management Framework and Implementation Strategy ("EMFIS") project. The Department is implementing estuary management in accordance with the NEM: ICMA and the National Estuarine Management Protocol ("NEMP"). Relevant guidelines, Estuarine Management Plans, Mouth Management Plans need to be considered when any listed activities are triggered in the Estuarine Functional Zone. The Department is in the process of approving a series of Estuarine Management Plans. Both draft and approved plans may be viewed at [DEA&DP: Coastal Management](#).
- 1.4. The facilitation of public access to the coast is an objective of the NEM: ICMA as well as a Priority in the WC PCMP. The Department developed the Provincial Coastal Access Strategy and Plan, 2017 ("PCASP") and commissioned coastal access audits per municipal district to assist municipalities with identifying existing, historic, and desired public coastal access. These coastal access audits also identify hotspots or areas of conflict to assist the municipalities with facilitating public access in terms of Section 18 of the NEM: ICMA. The PCASP as well as the coastal access audits are available on the Departmental website at [DEA&DP: Coastal Management](#).

## **2. COMMENT**

- 2.1 The sub-directorate: Coastal Management ("SD: CM") has reviewed the information as specified above and have the following commentary:
  - 2.1.1 The applicant is proposing a Maintenance Management Plan for the Bigai River Floodplain in the Knysna Municipality to clear culverts/existing stormwater channels in the wetland. The majority of the work is proposed to be conducted by hand with some areas requiring minimal machinery to excavate material. Furthermore, the recommended maintenance will not involve the development of any new structures or infrastructure.
  - 2.1.2 The SD: CM notes that the Bigai River system feeds into the Knysna Estuary which provides an important function of providing freshwater to the estuary but currently this function is being compromised by the blockages.
  - 2.1.3 The applicant has adequately considered the estuarine functional zone ("EFZ") and its purpose as some parts of the proposed maintenance sites are along the Knysna Estuary. The SD: CM also notes that the applicant considered the DEA&DP 2013 Lidar survey data of coastal areas.
  - 2.1.4 The MMP adequately considered critical biodiversity and ecological support areas in accordance with the Western Cape Biodiversity Spatial Plan (2017).
  - 2.1.5 The proposed mitigation measures as stipulated in the draft MMP are appropriate and practical and should be strictly adhered to, and as such the SD: CM does not object the Maintenance Management Plan for the Bigai River Floodplain.

3. The applicant must be reminded of their general duty of care and the remediation of environmental damage, in terms of Section 28(1) of NEMA, which, specifically states that: *"...Every person who causes, has caused or may cause significant pollution or degradation of the environment must take reasonable measures to prevent such pollution or degradation from occurring, continuing or recurring, or, in so far as such harm to the environment is authorised by law or cannot reasonably be avoided or stopped, to minimise and rectify such pollution or degradation of the environment..."* together with Section 58 of the NEM: ICMA which refers to one's duty to avoid causing adverse effects on the coastal environment.
4. The SD: CM reserves the right to revise its comments and request further information from you based on any information that may be received.

Yours faithfully

---

Goeie more Louise-Mari

Hiermee my bydrae tot die debat rondom die Bigai sisteem

1 Ek stel voor n kommittee moet gestig word, "Bigai Kommittee".

- die lede moet hoofsaaklik inwoners rondom die vlei wees (4), golfbaan(1), munisipaliteit(1), parkeraad(1).
- die BK moet autonoom wees en self besluite kan neem tov onderhoud en beheer
- bevondsing vir die take van die kommittee moet van die munisipaliteit kom as deel van die algemene begroting.

2 Riool: Dit is baie skokkend duidelik dat die vaal van munisipale infrastruktuur tov riool veroorsaak geweldige uitdagings. Deksele moet beveilig word dat hulle nie kan oopmaak en uitlek nie. Die pomp area moet beveilig word dat riool nie in die vlei loop, wanneer die pomp wanfunksioneer nie.

3 Ek wil dit op rekord plaas dat ons die toedrag van sake het, weens munisipale wanbestuur.

Hulle moet derhalwe nie meer in beheer wees van die toekomstige hantering van die Bigai Vlei nie.

Die uwe

Dr Johan Olivier

Hallo Vanessa,

My apologies for the delayed response.

I have a copy of the national Screening Tool and Site Sensitivity Verification Report that typically follows the Screening Tool I can send you.

The document you have as the MMP is the one currently circulating for comment.

Comment period only ends 13 November, so some time still. Please let me know if you need any specific information. I can also arrange for Dr Dabrowski to assist with any queries or clarifications if need be (she is the aquatic specialist who mostly compiled the report).

The Municipality did in the interim obtain a Section 30A Directive for emergency work following the recent heavy rains – some areas form part of the MMP (but getting done earlier ito emergency provisions), but future maintenance will still have to be undertaken under the MMP once approved.

I hope this provides some clarity. And good luck with taking up the helm!!!

Kind regards / Met Vriendelike Groete,

Subject: Draft MMP Bigai Wetland Maintenance Management Plan for COMMENT

Good Afternoon,

RE: REQUEST FOR COMMENT ON THE BIGAI WETLAND MAINTENANCE MANAGEMENT PLAN, KNYSNA MUNICIPAL DISTRICT

Your attention is drawn to the attached MMP for the Bigain Wetland in Knysna.

The Bigai Wetland runs through a portion of Knysna, bordering and including the Knysna Municipal Golf Club. It is a small catchment area. Historical and continued development along this catchment has resulted in (A) an increase in hardened surfaces which equates to an increase in stormwater runoff volumes and (B) there has been substantial erosion in this catchment area resulting in siltation and sediment blocking existing culverts and stormwater channels in the wetland. The system feeds into the Knysna Estuary and it is important that its function of providing freshwater to the Estuary is maintained (currently the blockages are compromising this function).

As a result, culverts and stormwater channels in the wetland are blocked (either by vegetation growth or sediment), resulting in chronic flooding which has increased over time. Some of the streets within this study area is permanently inundated with water resulting in tremendous challenges to residents and municipal workers alike who has to traverse these streets on a daily basis. This MMP is ONLY for the clearing of culverts/existing stormwater channels in the wetland. The majority of work will be done by hand with some areas requiring minimal machinery to excavate material.

The recommended maintenance work does not involve the development of any new infrastructure or structures. In summary, Table 9 of the draft MMP stipulates each of the areas (culverts) that must be cleaned out, along with their coordinates (these are also all mapped) and the necessary work methods and mitigation measures.

This document is in draft format and has been compiled by Confluent Consulting on behalf of the Knysna Municipality (as the landowner and Applicant). Confluent Consulting in turn requested that Cape EAPrac assist with the stakeholder engagement process prior to submission of the Final MMP to the National Department of Fisheries, Forestry & Environmental Affairs (DFFE) for decision-making.

During consultation with the DFFE, the Case Officer requested that the draft MMP be distributed to Key Stakeholders (Authorities) ahead of the official 30-day commenting period to allow some additional time for Authorities to review and submit comment on this draft document.

The DFFE has highlighted the importance, to them, of having your comment (if applicable) to inform their decision-making process.

You will also be receiving the official (30-day) commenting period day notice, which will contain the last day (date) for submission of comments. In the interim however please do take some time to consider this MMP and should you have any queries please do not hesitate to contact me directly.

Considering the recent flooding over the weekend, the Municipality urgently needs to conduct the maintenance work as stipulated in this MMP. Your input is therefore requested at your earliest convenience.

Kind regards / Met Vriendelike Groete,

---

Good evening Ms van Zyl,

I was walking in the Bigai wetland area today and noticed your call for comments on the MMP. Would it be possible for me to get a copy? If it can be mailed to me at this address I would appreciate it. Otherwise let me know where I can have access to it.

Regards  
Andy Smithen
