The Breede-Olifants Catchment Management Agency (BOCMA) has evaluated the submitted documents and has the following comments:

1. The proposed activities do not trigger water uses as defined in section 21 of the National Water Act, 1998 (Act 36 of 1998). This office does not have an objection to the proposed project. The proposed handling of general waste, water saving measures and handling of wastewater must be adhered to as provide in the report.
2. Please ensure that no water is taken from a water resource for any purpose without authorisation from the Responsible Authority.
3. Please ensure that no waste or water containing waste is disposed in a manner which may detrimentally impact on a water resource without authorisation from the National Water Act, 1998 (Act 36 of 1998) and other related legislations.
4. No pollution of surface water or groundwater resources may occur due to any activity. Stormwater management must be addressed both in terms of flooding, erosion, and pollution potential.
5. No stormwater runoff from the application premises containing waste, or water containing waste emanating from any activity may be discharged into a water resource without prior treatment.

The BOCMA reserves the right to revise initial comments and request further information based on any additional information received.

Yours faithfully
